BLOOD BANK.

SUMMERY:

A **blood bank** is a center where blood gathered as a result of blood donation is stored and preserved for later use in blood transfusion. The term "blood bank" typically refers to a division of a hospital where the storage of blood product occurs and where proper testing is performed (to reduce the risk of transfusion related adverse events). However, it sometimes refers to a collection center, and some hospitals also perform collection. Blood banking includes tasks related to blood collection, processing, testing, separation, and storage.

PROJECT ABSTRACT:

The project is a program that receives from everyone who wants to donate blood their name, city and blood type for easy access to owners of different blood types in emergency cases and operations.

PROJECT OBJECTIVES:

The speed in reaching the donors of the target species during surgeries and accidents.

SCHEDULING PHASES:

FROM	TO	ACTIVITY
13/3	17/3	Study The Basics And OOP of Java
18/3	10/4	Download Android Studio and start up of coding
11/4	28/4	Join my template's program with my coding
